

RESPONSIVE TOP ALL VIDEO BANNER

Technical specifications

Banner size (px)		Weight GIF, JPG, PNG	Weight HTML5
1600x400 (expanded) 1600x100 (collapsed sticky)*	Desktop	250kB	350kB
600x300 (expanded) 600x200 (collapsed sticky)*	Mobile	150kB	250kB
MP4 VIDEO (max 5MB)			

Top ALL banner is a collapsing banner on the top of the page that starts off expanded and collapses on scroll event and expands again if scrolled back up. The collapsed state is sticky and scrolls along with the page.

The close X button (44x44px) appears after the banner collapses for the first time and after that it will be on top of both closed and expanded states of the banner. The button is added on top of the banner by DELFI and is located on the top part of the banner.

The VideoPlayer component works in all major browsers that support the HTML5 video element, but there are limitations for some features. Details are provided in the following

[Supported video formats](#)

DESKTOP [Preview LINK with example](#)

DESKTOP Video Top all banner

- Dimensions: **1600x400px + 1600x100px**
- Weight Limit: **80KB + 5MB video**
- Formats: **JPG, PNG + MP4 VIDEO**

SAFE AREA

The 1200px wide area in the center of Top all banner dimensions is "safe area" that is sure to display on smaller screens. Wider than safe area might be hidden and should therefore be used with discretion.

MOBILE [Preview LINK with example](#)
